

Combat Bass Fishing Order #0000000058

Sold to: justin keithley (test@test.com) on 3/2/2010 5:23 AM

**Search Terms:**

Body Of Water : Lake St. Clair Structure : All Wind Direction : N, NNE, NE, NW, NNW

## Summary by Location

**Locations:**Little Muskamoot

[Report #0000000030](#)

**Report Text:** We decided to fish this shallow bay in spite of the cold front temps. It's a good seasonal choice. The light weed growth is exactly what we want to find. Nobody home.

**Author Notes:** We were able to get them in 5 1/2 feet last week.

**Locations:**Windmill Point Backwater

[Report #0000000037](#)

**Report Text:** This trough was holding big numbers of 5 inch largemouth and also a couple of quality smallies including this 3.5 lb. beauty.

**Author Notes:** Huge numbers of 6" largemouth in the weedbeds.

**Locations:**Strawberry Ridge

[Report #0000000158](#)

**Report Text:** This is one of the two most active areas we have found in the last two weeks. Last year, this area was responsible for big numbers of limits brought to the scales. I only heard of one limit hitting the three pound average mark though.

**Locations:**Anchorville Ruins

[Report #0000000223](#)

**Report Text:** Anchor Bay Ruins had the usual keeper largemouth on it. When we got there on Tuesday, water quality was very poor. It had that gray, St. Clair Flats muddy look to it. We still managed to get one keeper without too much effort on a spinnerbait.

**Author Notes:** Surface activity

## Complete Reports: Record by Record
